

Code for video: "Fire up the server!"

1. Make sure you are in the proper directory (see the previous video for basic terminal navigation commands)
2. Enter the command: `rails server -p $PORT -b $IP`
3. Click on the link to preview your application.
4. Back in the terminal hold the CTRL key and press letter c (this shuts down the server)
5. To restart you can use the arrow keys to view previous commands. When you see `"rails server -p $PORT -b $IP"` you can press enter to restart your server.
