

Code for video: “Heroku.com Gems”

Open your gemfile and create a “production block”

```
group :production do
```

```
end
```

1. Go to <https://www.heroku.com/> and create an account
2. Go to <https://rubygems.org/gems/pg> and get the gem 'pg', '~> 0.18.4' file then paste it into your gemfile
3. Go to [https://rubygems.org/gems/rails\\_12factor/versions/0.0.3](https://rubygems.org/gems/rails_12factor/versions/0.0.3) and get the gem gem 'rails\_12factor', '~> 0.0.3' file then paste it into your gemfile
4. Run bundle install
