

Code for video: "Footer Padding"

Go into `app/assets/stylesheets` and create a file named `custom.css.scss`

In this file paste in

```
body {  
  padding-bottom: 110px;  
}
```

Next go to the `application.css.scss` (it's in the same folder)

And add this code

```
@import "yeti";  
@import "custom";
```
