

Code for video: “Paginate”

Update your gemfile with these two gems and run bundle.

(make sure to grab the latest versions at rubygems.org)

```
gem 'will_paginate', '~> 3.1'
gem 'will_paginate-bootstrap', '~> 1.0', '>= 1.0.1'
```

Next update the articles controller:

```
def index
  @articles = Article.paginate(page: params[:page], per_page: 2)
  @last5 = Article.last(5)
end
```

Now update your articles index view with:

```
<%= will_paginate @articles %>
```

!!!!REMEMBER TO RESTART THE SERVER ;-)
