

Code for video: "Creating Our Application"

1. Go to c9.io and create a free account
2. Create your application by choosing "create a new workspace"
3. Choose a name for your app then click on the "rails icon" at the bottom of the page then click "create workspace"
4. Now click on the "plus icon" and select "new terminal"

5. Make sure you are in the proper directory (see the previous video for basic terminal navigation commands)
6. Enter the command: `rails server -p $PORT -b $IP`
7. Click on the link to preview your application.
8. Back in the terminal hold the CTRL key and press letter c (this shuts down the server)
9. To restart you can use the arrow keys to view previous commands. When you see "`rails server -p $PORT -b $IP`" you can press enter to restart your server.
