

Code for video: "Time Saver and Email Recovery"

Create "gp" file in root of app

Add text

```
git add -A  
git commit -m ""  
git push origin master  
git push heroku master
```

in your terminal enter

```
chmod +x gp
```

change file in config/ initializers / devise.rb

```
config.mailer_sender = 'do_not_reply@whatever-you-want.com'
```

Set up your production.rb file found in config/environments

```
config.action_mailer.default_url_options = { host: 'https://your-app-name.herokuapp.com/' }  
  
end
```
