Code for video: "Routes Controller"

1. Go to config and open routes.rb

Update file with

Rails.application.routes.draw do

```
devise_for :users, :controllers => { registrations: 'registrations' }
resources :articles do
  resources :comments
end
resources :contacts
root to: 'pages#index'
get 'pages/contact'
get 'pages/about'
```

end

2. In our controllers folder make a new file called comments_controller.rb

class CommentsController < ApplicationController

end
