Code for video: "Controller Create Method"

```ruby
  def create
    @article = Article.find(params[:article_id])
    @comment = @article.comments.create(params[:comment].permit(:body))
    @comment.user_id = current_user.id if current_user

    if @comment.save
      redirect_to article_path(@article), notice: "Your comment has been saved."
    else
      redirect_to 'new'
  end
end
```
