Code for video: "Comment Partials"

1. Go to views and create a new folder called "comments"
2. Inside this folder create three files – edit.html.erb _comment.html.erb and _form.html.erb
3. Make sure that comment and form start with an underscore.
4. Inside the comment.html.erb file place.

```
<div class="media">
  <div class="pull-left">

  </div>
  <div class="media-body">
    <p class="media-heading pull-right">
     Testing
    </p>

  </div>
</div>
```

5. Go into the articles folder an open index.html.erb and update it so it looks like this.

```
<%= render 'comments/comment' %>

<br>

<%= link_to 'New Article', new_article_path %>
```
